

QUALITY STAINLESS & PIPING SOLUTIONS

OUR CAPABILITIES

OUR COMMITMENT

Respect - We are honest, considerate and act with integrity.

Safety - We stop and think; then act to prevent injury.

Teamwork - We engage diverse views, to achieve better outcomes.

Integrity - We take responsibility and follow through on our commitments.

Improve - We strive to continually improve.

ABOUT US

The company is proudly
Tasmanian owned.

Kolmark Pty Ltd was formed in 2001
McLaine Stainless has been operating
since the early 1970s.

The company was added to Kolmark in
2010 to further expand our industrial
fabrication capabilities.

Our core business is specialized
piping, industrial stainless steel, tank
fabrication and mechanical projects.

CERTIFIED WELDING

Storm Water Pump Station for
MMG Rosebery 2012.
450NB 316SS - Piping to AS4041

Pressure Vessels
Built to AS1210

We have the resources for pressure
vessel design and certification, and
standard quality procedures that
ensure what you need is what you get.

TANKS

Kolmark McLaine Stainless has the capability to design, fabricate and install tanks and pressure vessels to suit any application, from 150 litre through to 250,000 and larger tanks and vessels.

We pride ourselves with working with our clients to ensure they receive the tank they need to suit their application.

WINE MAKING EQUIPMENT

Kolmark manufacture Wine Tanks and other equipment for the wine industry.

We can fabricate storage tanks to our standard specifications or a custom tank to suit your requirements.

Our tanks can come as a full package including heating/cooling jackets and insulation, or basic storage tanks to suit your needs.

MILK STORAGE TANKS

Kolmark can fabricate a Horizontal or Vertical milk storage tank to our standard specification or a custom tank to suit your requirements.

Our tanks can come as a full package including CIP module and Chiller unit or the Tank alone if you have existing equipment that can be utilised.

We are Tasmania's premier Stainless steel manufacturer of Tanks and Silos for the Food and Dairy Industry.

PIPING PROJECTS

Anything from a simple pipe replacement to a full design, fabrication and installation of a complete new process or factory is what we do best.

We have the ability to use automated welding processes to efficiently weld pipe work to the highest quality standard.

We have a full library of weld procedures that covers welding Stainless Steel Tube, Stainless Steel Pipe, Carbon Steel Pipe and Aluminium Pipe.
